

REMARKS

Claims 1-14, 17-29 are pending in this reissue application. The scope and language of the allowed claims has been agreed upon. In response to a telephone call of December 20, 2004 from the Examiner, the claims are being resubmitted with correct identifiers for reissues. Changes from the issued patent with respect to the claims have been underlined and deletions bracketed. It is presumed the Office will renumber so that claims 17-29 are in fact in the actual reissued patent as claims 15-27.

Finally, as earlier pointed out to the Examiner that the Legal Department's concern, concerning lack of antecedent basis for the term "body" when describing the syringe as opposed to the word syringe which is in fact used in the specification, was eliminated by simply eliminating the word "body" from the claims 18, 25, 27 and 28.

There being no other objections, it is submitted the case should be allowed. For promptness and convenience of the Examiner, this is being filed by e-mail along with a telephone call notifying the Examiner of the filing.

Respectfully submitted,

EDMUND J. SEASE, Reg. No. 24,471
